MODERN FURNITURE

FueraDentro is a Dutch furniture design house that creates contemporary outdoor furniture that is also suitable for indoor use. FueraDentro means outside and inside in Spanish and is the inspiration for all of the furniture collections designed and manufactured by the company. Established for over 10 years, the head office and showroom is situated along the iconic Prinsengracht canal in Amsterdam.

Prominent, established designers and new talented designers are supported and nurtured from their very initial ideas through to the quality of the manufacturing process and final customer delivery.

Each furniture collection or one-off piece is designed to create elegant shapes, as well as the underlying principal of ergonomic comfort. Throughout the FueraDentro design process, focus is placed upon both the aesthetic and functionality, as much as utilizing the latest manufacturing technologies. This culminates in the FueraDentro furniture pieces being able to compliment the colours and tranquility of any environment both outside and indoors.

Whilst creating any collection, FueraDentro are mindful of the environmental impact that it may create. The choice of appropriate materials is intrinsic to the design process for all FueraDentro collections. Wherever possible, FueraDentro designers specify materials that are either natural or recyclable.

The final outcome from the design and product development processes are unique, contemporary and comfortable furniture collections. This allows you to create relaxing outdoor areas, that reflect the beauty of the natural environment.

OLIVIER OLIEMANS

FOUNDER

AMSTERDAM

A CITY OF STYLE

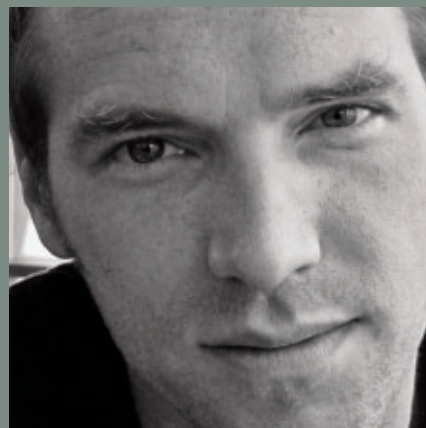

During the late 17th Century the canals and the River IJ gave Amsterdam the infrastructure to become the most important trading city in the world.

The deep harbours surrounding Amsterdam enabled large fleets of ships to trade their cargo from around the globe. The unique canal system made it easy for merchants to trade and transport their products.

The canals are still synonymous with Amsterdam and its contemporary culture, used both for leisure and living on. The Dutch and visitors alike, appreciate the pleasures of the canal, from the picturesque walks with architectural views, through to canal sailing or waterside picnics. Amsterdam's canals are a beautiful way to discover a unique city.

HAND POLISHED STAINLESS STEEL & GLASS

TABLE 140G Ø 140 CM H: 74 CM

TABLE 150G Ø 150 CM H: 74 CM

The E-VOLVED interior and exterior collection is the very latest furniture range from FueraDentro. This has been elegantly created by the acclaimed German designer Timothy Schreiber.

Inspired by pop modernism the E-VOLVED table is organic in its composition and is smooth to the touch. The tactile curves of the legs are unbroken and are created from hand-polished stainless steel.

E-VOLVED
THINKING DESIGN

The graceful, fluid design mimics the organic forms of nature as the three table legs grow and branch together to form a solid and stable base for the table.

CIMA COLLECTION
HENDRIK STEENBAKKERS

The CIMA collection has been created by Dutch designer Hendrik Steenbakkers. This is a complete collection of well designed, striking and minimalist outdoor furniture. The robust stainless steel frames hold the seated area in suspension, thus creating light and inviting furniture that is truly relaxing and enjoyable.

Each piece is designed to compliment one another. The collection includes chairs, tables, sun loungers and a footrest. Complementary planters add the finishing touch to create a unique outdoor living space.

The chairs, footrest and sun lounge seating material are made of Batyline® and the table tops can be customised with glass, teak or Belgian bluestone. Depending on the final location of the furniture, there is also the option to have the stainless steel electro-polished to prevent corrosion.

CIMA COLLECTION

All of the elements within the CIMA collection keep the clean minimalist lines that are visually striking and ultimately comfortable.

To enable the CIMA Lounge collection to fit comfortably into any indoor or outdoor space, a unique and seamless connector is now an integral part of the range. The stainless steel connectors make it easy to arrange different modules of the CIMA Lounge collection into many configurations.

There are a host of different modular possibilities, such as combining the Poltrona Lounge and Banca Lounge to create an extensive large sofa. Additionally, if combined with the Piecera, or the Siesta Lounge, an elegant L-shaped piece can be formed. Low armrests are also available, that follow the lines of the seating for real comfort without compromise. See page 82 for further information.

LOUNGE CUSHION SETS

The CIMA Lounge collection cushions are available in two very durable, hard wearing, UV resistant and waterproof materials. The Stamskin® synthetic outdoor leather cushions are available with or without buttons and the reverse of each cushion is stitched with Batyline®. This ensures that each cushion can breathe. The solution dyed acrylic fabric option is machine washable and very hardwearing so you can relax in comfort year after year.

SHELL COLLECTION
JAN DES BOUVRIE

FUERADENTRO.COM

The SHELL Collection, has been specifically created for FueraDentro by the Dutch designer Jan des Bouvrie. This extensive collection comprises of a chair, an easy chair, a sofa, as well as 4 tables and a luxurious sunbed.

The most notable characteristics of the SHELL collection is the rounded shape of the shell-like cocoon seats, which bring a stunning and comforting sense of relaxation. The seats are made using a hand woven coaxial structured Batyline® fibre that is tactile, functional and will last.

The frames are made of electro-polished stainless steel and the tabletops are glass. All materials are 100% recyclable. This combination of materials makes the SHELL collection ideal for outdoor use.

All of the elements within the SHELL collection keep the clean minimalist lines that are visually striking and ultimately comfortable. The inviting style of the SHELL collection can be further enhanced with co-ordinating cushions. These cushions are covered in solution dyed acrylic fabric, which is machine washable and very hardwearing, so you can relax in comfort.
